DETAILED ACTION

Acknowledgements

Applicant's request for continued examination (RCE) filed on 03 August 2007 is acknowledged.

This paper is assigned Paper No. 20071025 by the Examiner.

Status of Claims

Claims 1-18 have been examined.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-18 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent Application Publication No. **2004/0078573 A1** to **Matsuyama**.

As per **claims 1-18**, Matsuyama discloses a method, system and an apparatus for authenticating an apparatus comprising:

- providing an apparatus programmed to communicate or facilitate communication at least one of within or across at least one network, wherein the apparatus is included within an organization including a plurality of apparatuses, at least one apparatus having at least one characteristic and being at least one of a plurality of positions within the organization (i.e., providing a portable unit 30 such as a portable telephone or a personal digital assistant (PDA) to access to various information household appliances, various information processing terminals, or servers all of which are installed in houses from the outdoors – Abstract, [0002, 0034, 0060, 0069, 0112], fig. 6);
- providing at least one role certificate to the apparatus from a secondary certification authority (CA) processor based upon the at least one position of the apparatus within the organization, wherein the organization includes a plurality of secondary CA processors programmed to issue at least one role certificate to respective groups of apparatuses of the organization ([0077 – 0089]);
- providing at least one permission certificate to the apparatus from a tertiary CA processor based upon the at least one characteristic of the apparatus that is located at a position within the organization, wherein the organization includes a plurality of tertiary CA processors programmed to issue at least one permission certificate to respective sub-groups of apparatuses of the organization ([0077 – 0089]); and

- authenticating the apparatus at a server based upon an identity certificate, the at least one role certificate, and the at least one permission certificate of the apparatus to thereby determine whether to grant the apparatus access to at least one resource of the server ([0006 - 0012, 0126, 0128]).

Conclusion

Examiner has cited particular columns and line numbers and/or paragraph and/or page numbers in the prior arts of record as applied to the claims above in the body of this action for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant, in preparing the response, to fully consider the references in its **entirety** as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior arts or disclosed by the examiner.
